## Objectives and Achievements

A self-motivated person who believes in growth and very open to new ideas. I am looking for the place where my skills and expertise is being fully utilised and proved to be an asset to the company. I am always fascinated towards continuous learning process and capable of working in a team.

## Professional Summary

- **2.5+**years of experience as a Software development Engineer i.e., Web-based applications and associated technology components. Distributed Architecture Applications using **Java, Angular**.
- Good Knowledge of **OOPs (Inheritance, Polymorphism, Abstraction, Encapsulation), COLLECTION, MULTITHREADING and EXCEPTION HANDLING**.
- **Built reusable components and dynamic, JSON-driven forms**, improving **development efficiency** and reducing repetitive UI work.
- **Implemented real-time data streaming and secure interactions**, enhancing **performance** and ensuring data protection in AI-integrated tools.
- Optimised front-end architecture with clean, modular Angular code, improving **maintainability** and **scalability** of applications.
- Contributed to three different projects as a **Java** and **Angular** developer, delivering full-stack solutions across multiple internal platforms.
- Automated **CI/CD pipelines** with **Azure Pipelines**, integrated with **Git** for version control and deployed to AWS, enabling daily deployments and reducing release cycle time by 80%.
- **Developed responsive and intuitive web interfaces** using **Angular**, delivering a smooth and consistent user experience across multiple internal platforms.
- Mastered **Micro services and Monolithic** Architecture in Spring Boot, and Angular implementing scalable and modular services.
- Developed and optimised **RESTful APIs**, ensuring high performance and scalability
- Hands on Experience in writing **Angular**.
- Worked on of **Spring Boot** and have hands on Experience on it..
- Good knowledge of **HTML, CSS, JavaScript** and have hands on Experience on it..
- Basic knowledge of **AWS**.

## Work Experience

- Worked as **Front-End, Developer** in **Russell Tobin** client as **Crisil** from **December 2023 to March 2026**.
- Working as **UI Developer** in **QUESS Corp Limited** client as **Crisil** from **March 2026 to Present**.

## Awards/Achievements

### Hackathon [CRISIL COALITION GREENWICH - 2024]

- Winner of the Hackathon for creation of **Client Pricing proposals**.

## Education

- **BCA** in 2022 from Veer Bahadur Singh Purvanchal University Jaunpur. (77%).

## Technical Skills

|                                       |                                                                                               |
|---------------------------------------|-----------------------------------------------------------------------------------------------|
| Languages                             | Java, SQL (DDL, DML, JOINS).                                                                  |
| Client-side Technologies              | HTML, CSS, JavaScript, Angular                                                                |
| Server-side Technologies              | JDBC                                                                                          |
| Development WORK EXPERIENCE           | Angular, Bootstrap, Primeng, PrimeFlex Spring Boot, Spring JPA, Spring MVC,Hibernate , JUnit, |
| Web Service Testing Tools             | Postman,SwagerApi                                                                             |
| Design Patterns                       | Singleton, Factory, Factory Method etc.                                                       |
| Databases                             | Oracle(basic),                                                                                |
| Logging Frameworks                    | Log4j.                                                                                        |
| IDEs                                  | Eclipse, STS.                                                                                 |
| Version Control Collaboration/Project | Git /GitHub.                                                                                  |
| Development WORK EXPERIENCE           | GitHub Copilot, AmazoneQ, ect.                                                                |
| Operating system                      | Windows,MacOs                                                                                 |

## Project Details:-

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Title #1                 | ModelInfinity                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Period                   | July 2025 to Present                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Position                 | UI Developer                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Responsibilities         | <ul style="list-style-type: none"><li>Developing and maintaining the <b>user interface</b> and <b>Deployments</b></li><li>Creating tools that improve site interaction regardless of the browser.</li><li>Managing <b>Application workflow</b> and Contributed in code review.</li><li>Responsible for writing <b>business logic</b> for retrieving the data from <b>data base</b>.</li><li>Involved in development of various screens using <b>Angular</b> .</li><li>Fixing Bugs and testing for usability.</li><li>Managing <b>Dark</b> and <b>light Mode</b>.</li></ul> |
| Project                  | <b>ModelInfinity</b> is an innovative financial research platform powered by cognitive automation that enables analysts to emulate certain tasks and optimize decision making for many others. ModelInfinity has model-ready data for <b>3,000+</b> in its central data library.                                                                                                                                                                                                                                                                                           |
| Operating System         | WINDOWS.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Languages/<br>FrameWorks | <b>Angular,Java,Java script, html, Css, bootstrap and Primeng, PrimeFlex2.0.</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|           |                           |
|-----------|---------------------------|
| Title # 2 | Theme Builder             |
| Period    | October 2024 to July 2025 |
| Position  | UI Developer              |

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Responsibilities</b> | <ul style="list-style-type: none"> <li>Defining color schemes and typography to match the <b>brand guidelines</b>.</li> <li>Testing across different browsers and devices.</li> <li>Ensuring consistency across components and modules.</li> <li>Implementing <b>dark</b> and <b>light</b> modes.</li> <li>Customizing <b>Prime Ng</b> components to align with the theme</li> <li>Change the token of <b>JSON</b> value According to user theme color.</li> <li>Manage the Theme Builder Tokens.</li> <li>Manage the CSS variables for Theme Builder.</li> </ul> |
| <b>Project</b>          | Developed and maintained the <b>Theme Builder</b> , an internal tool for <b>[myRon.ai]</b> . Successfully reduced the user interface load time by 100% through optimized PrimeNG component usage. Improved user satisfaction scores by 100% by implementing intuitive and responsive UI components.                                                                                                                                                                                                                                                               |
| <b>Operating System</b> | WINDOWS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
